

# Quarter-turn & Bevel Gearboxes in AISI 316, Ductile Iron, Carbon Steel.

Suitable for the following  
Types of Valves:

BUTTERFLY

BALL

PLUG

GLOBE

GATE

**MECCFOR**  
MECHANICAL COMPONENTS SUPPLIES.

# About Meccfor

Meccfor is an expert, dynamic and professional Company operating in the supply of components and final products in addition to construction of parts manufactured according to the customer design.

Meccfor can meet all Customer's requests in terms of flexibility and technical competence.

Meccfor operates in the domestic market with one optimal ratio quality-service, able to satisfy the customer and create a partnership in order to provide a product which can satisfy the customer.

## Qualified Team

Quality of products, along with the experience's of a qualified technical staff, satisfies customer request.

## Production Process

Meccfor can supply a 360°service, from the initial idea to the final product, with the maximum attention in any phase of the production process.

## Fluid Management

Meccfor knows very well the market of fluid's movement and could supply products as valves, pumps, fans, gearbox for valves and fittings.

## Design

Meccfor could supply 2D and 3D drawings and technical consultants, support to the project, make prototypes and final pre-series, mainly for any type of valves and gearbox for valves.

## Gearbox for Valves

- Meccfor is specialized in supply of gearbox quarter turn devices for the operation of ball, butterfly and plug valves.
- 30 years of experience of our technicians assure a correct and reliable supply for a very important component for the correct function of the valve.
- Gearbox could be supplied with cast iron or stainless steel case.
- Assistance in the selection phase with the possibility to realize dedicated 2D and 3D drawings.

# MCF Series Product Structure

1

The installation of pointer disk on the top of the worm gear can clearly indicate the opening and closing position of the valve

2

The worm gear made of Ductile iron QT500-7 has the characteristics of high strength and wear resistance

3

The mechanical limit screw is set in the open / close direction to accurately limit the valve stroke

4

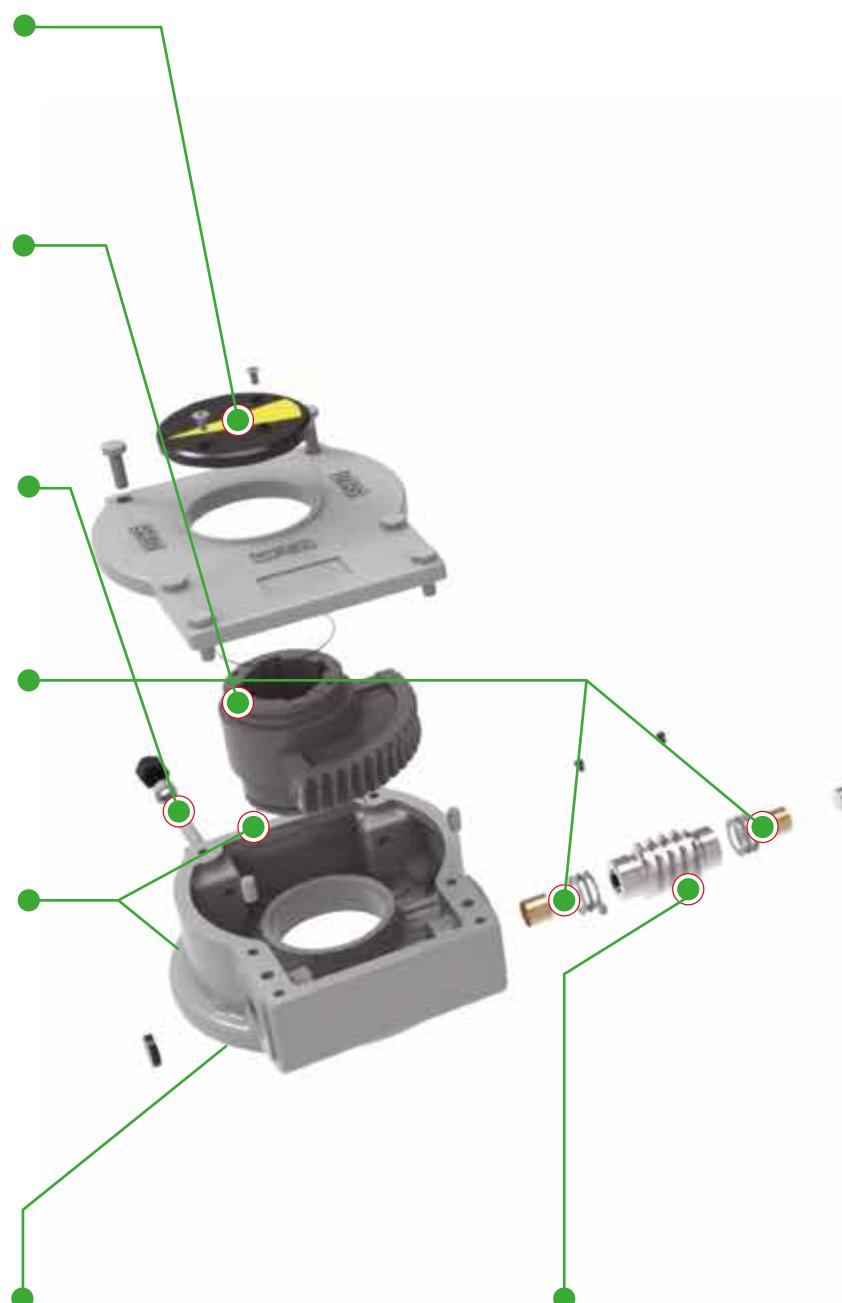

High precision worm and bearing close fit, significantly improve the transmission efficiency

6

The cover of worm gear box and secondary reduction box are made of ductile iron, and the joint parts are sealed with O-ring or skeleton oil seal, and the waterproof grade reaches IP67.

7

The valve connection is designed according to ISO5211-2017 standard, which is convenient for users to match

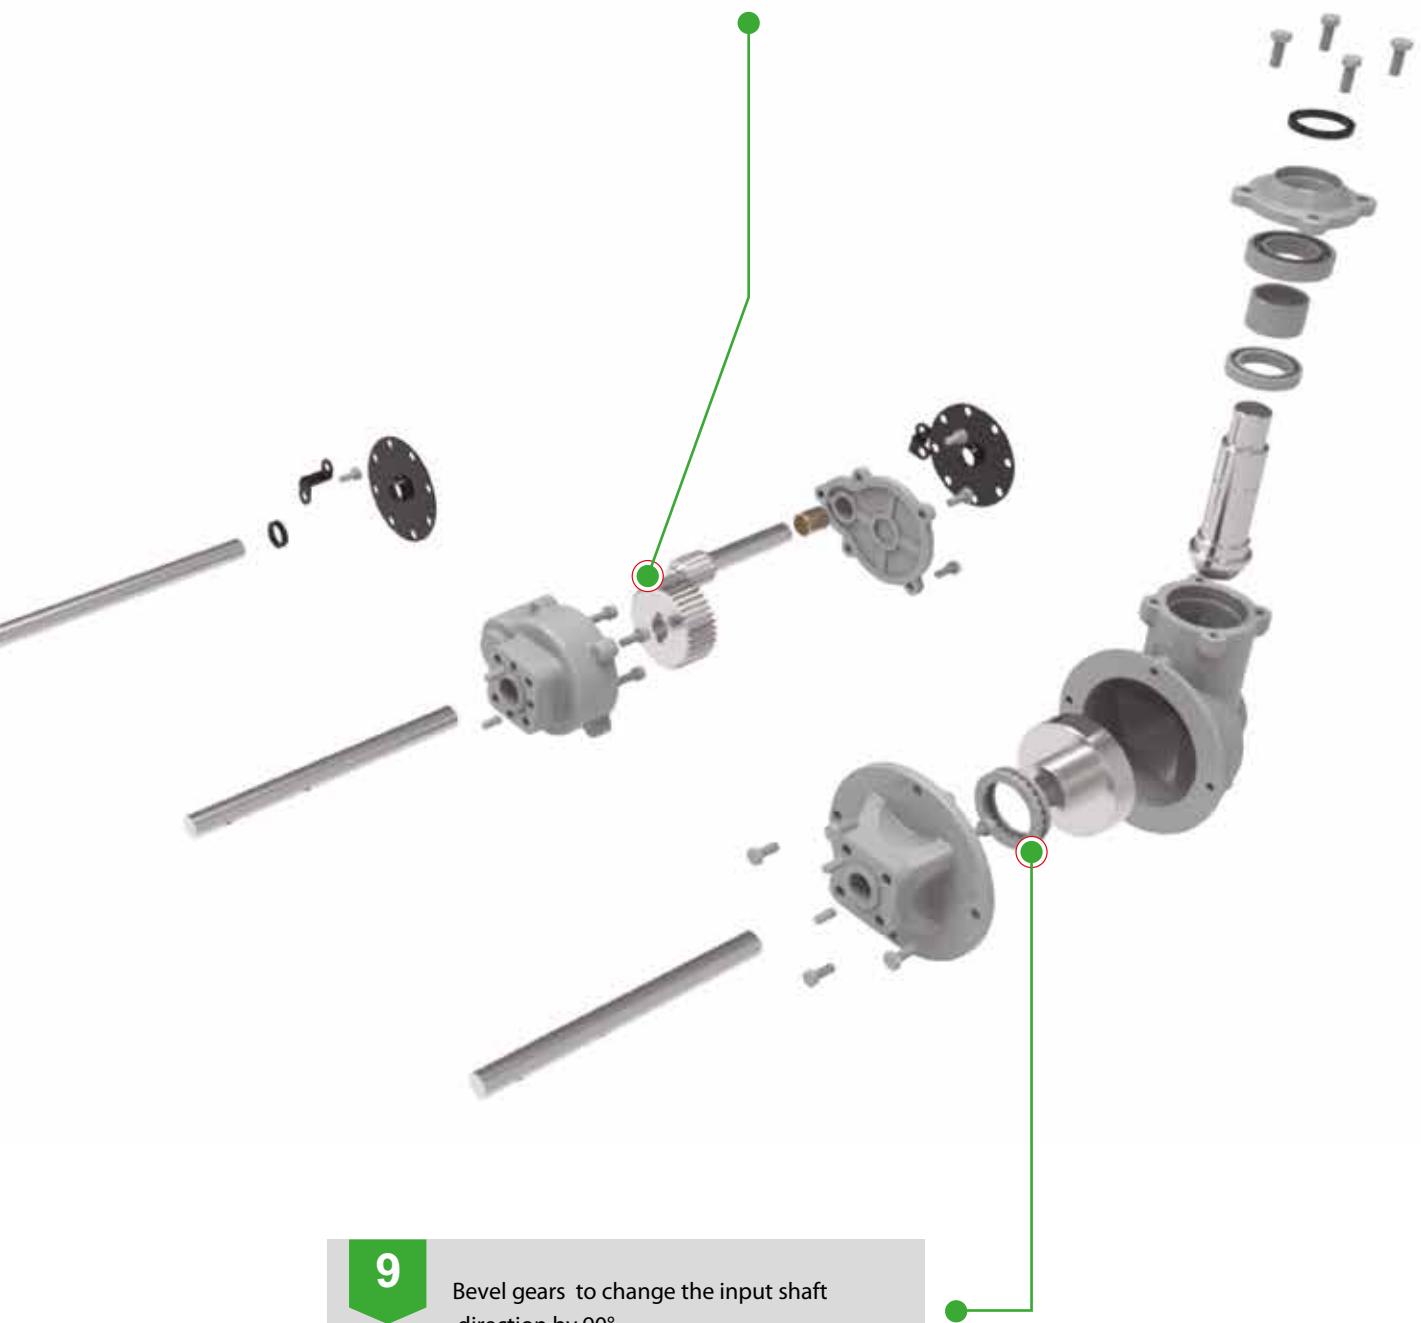

8

The worm is made of 20CrMnTi material, carburized, Quenched and grinded, which is highly efficient, firm and wear-resistant

**5**

For products with large operating torque, when used for manual operation, it is equipped with efficient spur gear / planetary gear to make the operation labor-saving and light

**9**

Bevel gears to change the input shaft direction by 90°

# MCF Standard Series Features

## Manual Gear Standard in Ductile Iron

- Housing in Ductile Iron
- Stem in Carbon Steel
- Handwheel in CS
- Locking device in CS
- Position Indicator in Aluminum/plastic
- 4 slots for key at 90°
- Protected by primer
- IP67 minimum

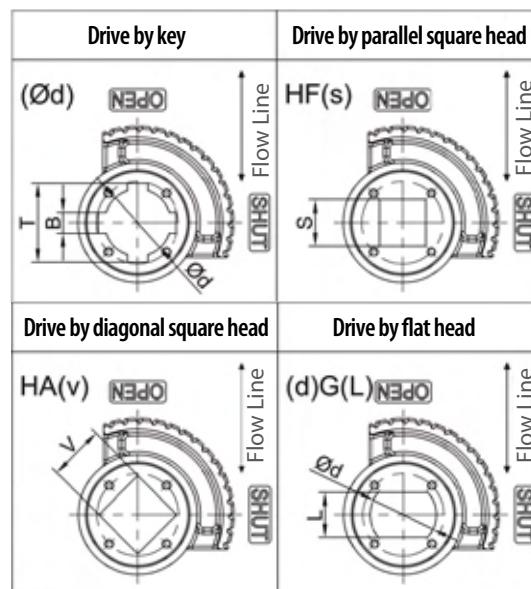

## Manual Gear in SS316

- Housing in SS316
- Stem in SS316
- Handwheel in SS316
- Locking device in SS316
- Position Indicator in SS
- Stops in SS316
- Nipple grease in SS316
- Nameplate in SS316
- 4 slots
- Not painted
- IP67 minimum

## Manual Gear in Ductile Iron - Marinized

- Housing in Ductile Iron
- Stem in SS316
- Handwheel in SS316
- Locking device SS316
- Position indicator in SS
- Stops in SS316
- Nipple grease SS316
- 4 slots for key at 90°
- IP67 minimum
- Protected by primer

**Note:** The Valve/Gearbox in the fully closed position.

# MCF Standard Series

## MCF Part-turn Gearbox Series

The Gears Series 'MCF' quarter-turn gear operators are rugged, industrial grade products manufactured with ductile iron.

## Applications

MCF series operators are quarter-turn devices intended for the operation of ball, plug and butterfly valves. The gearboxes are suitable for manual application.

## Features

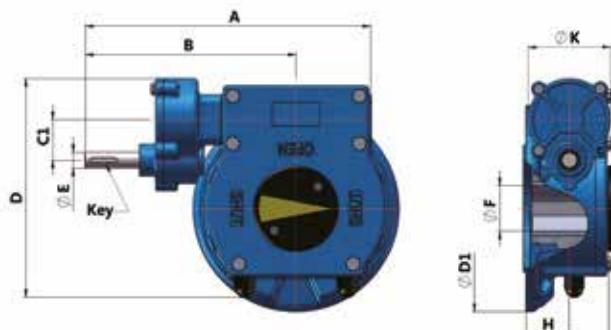

- Padlockable handwheels
- Protected steel input shaft (stainless steel optional)
- 25 models up to 600000Nm in output.
- Standard Enclosure: IP67
- Temperature: -20°C to +80°C
- Stroke: 0-90° ( $\pm 5^\circ$  adjustchart)

## Options

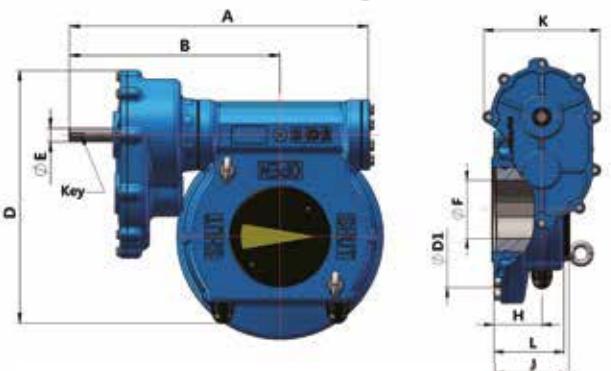

Available on demand:

- Stainless Steel AISI 316
- Stainless Steel AISI 304
- Carbon Steel

# MCF-QG Series Product Structure

1

All series are equipped with steel indicator, strong and beautiful

2

Skeleton oil seal is more reliable and durable than O-ring

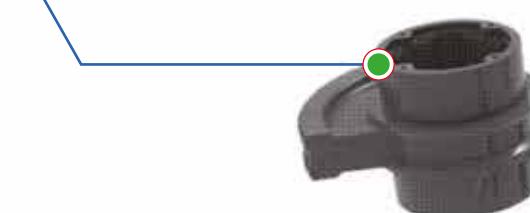

3

The worm gear made of ductile iron QT500-7 has the characteristics of high strength and wear resistance

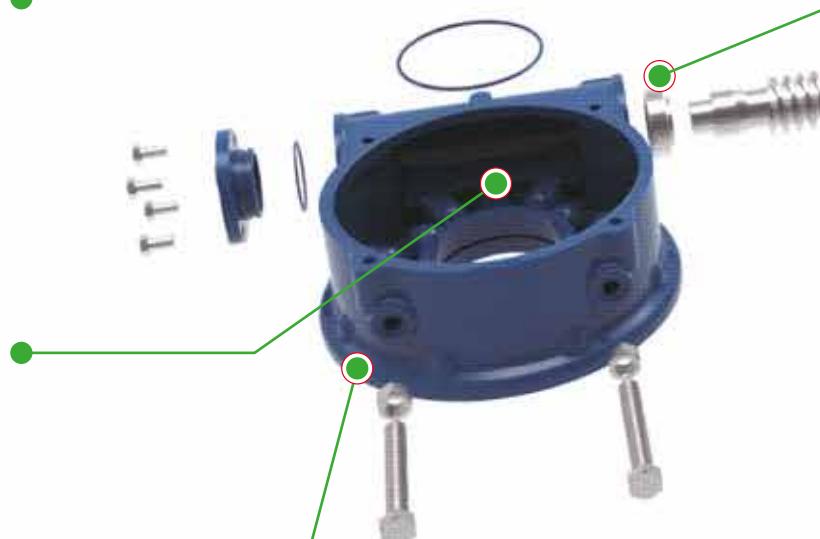

4

High precision grinding worm and tapered roller bearing are closely matched, which can significantly improve the transmission efficiency

6

The cover of the worm gear box and the secondary reduction box is made of cast steel, and each joint part is sealed with O-ring or skeleton oil seal, and sealed to IP67

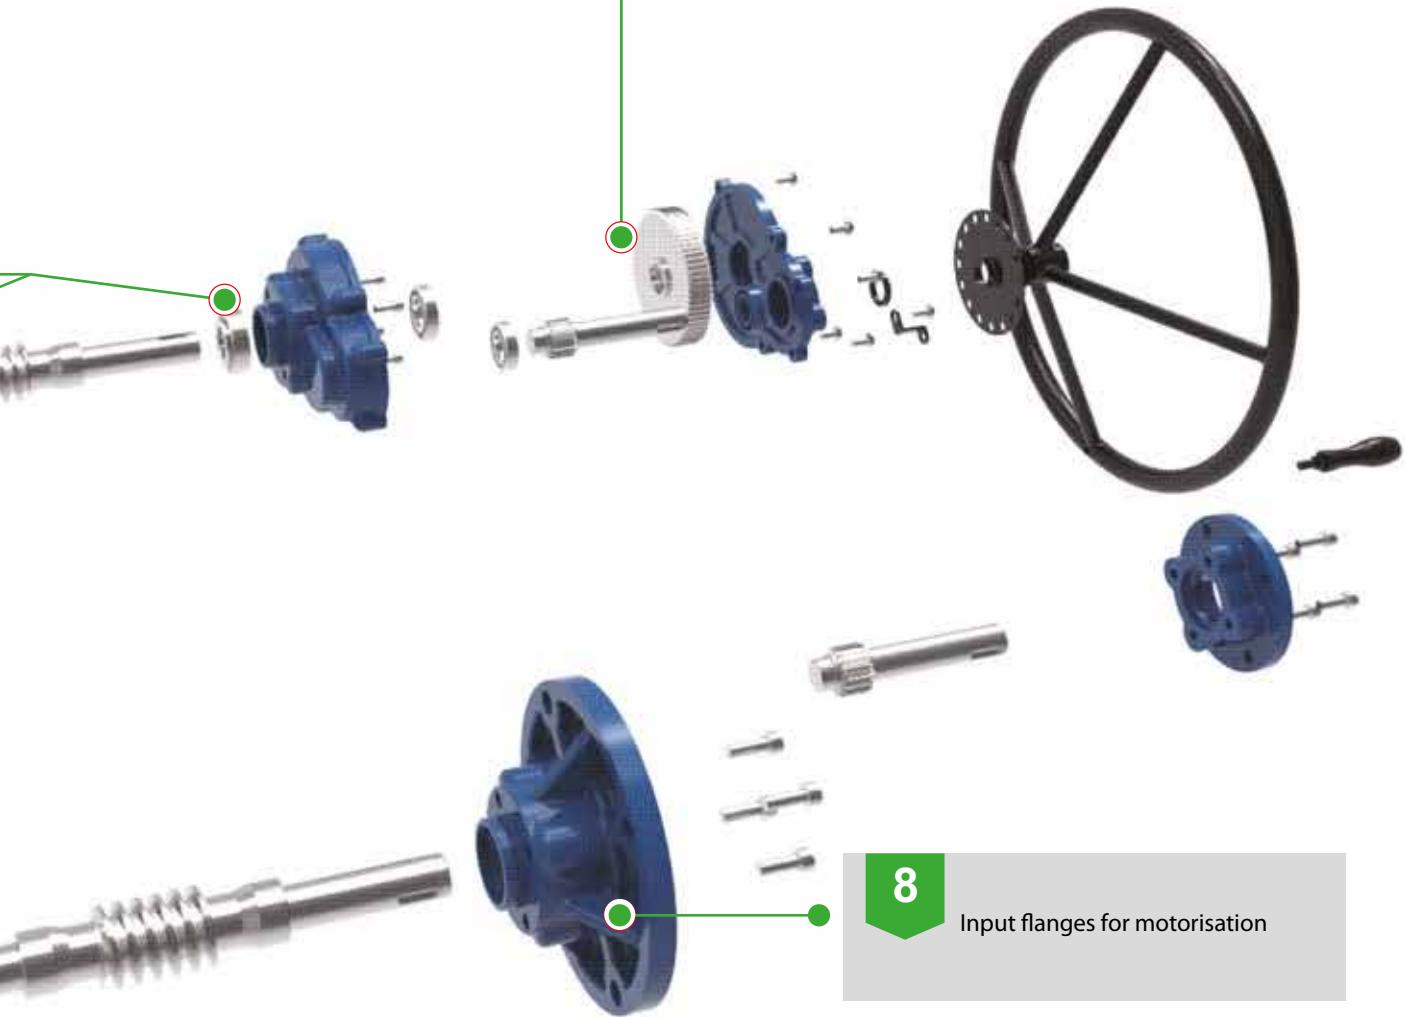

7

The valve connection is designed according to ISO5211-2017 standard, which is convenient for users to match

**5**

For the products with large operating torque  
the high-efficiency spur gear/ planetary  
gear is configured to effectively reduce  
the input torque

**8**

Input flanges for motorisation

# MCF-QG Series

## WQG Part-turn Gearbox Series

MCF-QG series gear box, cast steel box, solid structure, meet the requirements of industrial grade.

The products use high performance tapered roller bearings, which are suitable for chemical industry, power plants, water plants, heating equipment and most industrial fields.

## Applications

MCF-QG series gearboxes provide a variety of connection flange options, suitable for ball valves, butterfly valves, plug valves.

## Features

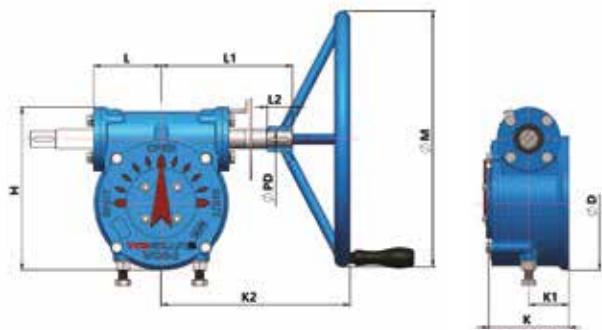

- Totally enclosed gear transmission
- Worm supported by round chain roller bearings
- 16 models up to 120000Nm.
- Standard Enclosure:IP67
- Temperature: -20°C to +80°C
- Stroke: 0-90° ( $\pm 5^\circ$  adjustment)

## Option

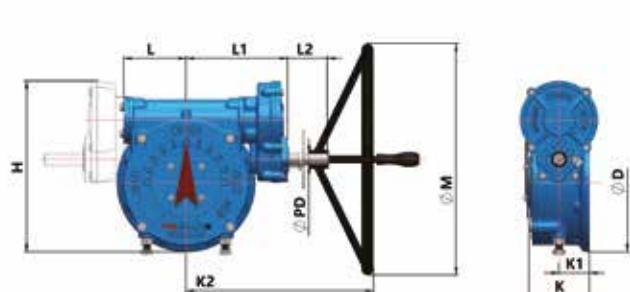

Available on demand:

- Stainless Steel AISI 316
- Stainless Steel AISI 304
- Carbon Steel

# MCF-QG-D Series

MCF-QG-D series gear box, used with electric actuator, cast steel box, solid structure, meet the requirements of industrial grade. The products use high performance tapered roller bearings, which are suitable for chemical industry, power plants, water plants, heating equipment and most industrial fields.

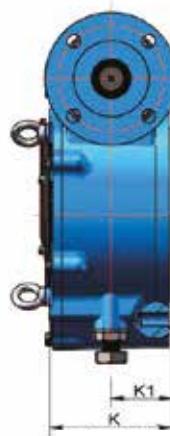

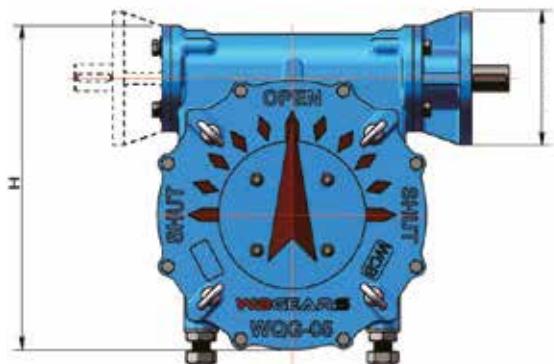

## Applications

MCF-QG-D series gearboxes provide a variety of connection flange options, suitable for Ball valve, butterfly valve, plug valve

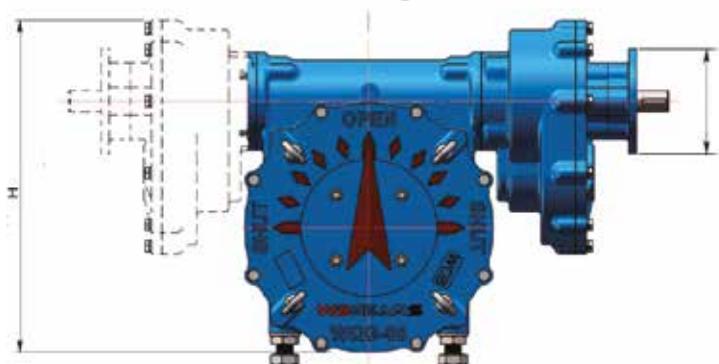

## Features

- With different spur gear reducers to achieve different Ratio
- Input flanges are available
- 16 models up to 120000Nm.
- Standard Enclosure:IP67
- Temperature: -20°C to +80°C
- Stroke: 0-90° ( $\pm 5^\circ$  adjustment)

# Marinized Gearbox Features Materials

The diagram illustrates various components of a marinized gearbox, each labeled with its material specification:

- Key:** SS316.
- Shaft:** SS316 (On Request).
- Locking Device:** SS316.
- Nameplate:** SS316.
- Handwheel:** SS316.
- Inspection Plug:** SS316 (On Request).
- Grease Injector:** SS316 (On Request).
- Safety Relief Valve:** SS316 (On Request).
- Boltings (Cover/Indicator):** SS316.
- Position Indicator:** SS316 (On Request).
- Setting Screws:** SS316.

Below the main diagram are four smaller photographs showing close-up views of the gearbox components: a handwheel assembly, a safety relief valve, a position indicator cover, and a lock device.

## Gearbox Suitable for DBB Valve to Meet Client Specification

A composite image featuring a large industrial facility at night on the left, with numerous illuminated structures and pipes against a dark sky. On the right, a detailed cutaway diagram of a gearbox assembly is shown, highlighting its internal components like gears and bearings.

# **MCF-Y & Bevel Series**

**Gearboxes  
in AISI 316,  
Ductile Iron,  
Carbon Steel.**

# MCF-Y - 1S Series

This series of products is quarter turn manual gear actuator. Suit to be used in ball valves, butterfly valves, plug valves, rotary ball valves etc. The housing made by precise casting, new design, nice appearance. It transmitted by worm gear and worm.

The worm gear with self-looking. With tapered roller bearing, so the gearboxes can be operated more flexibly and have higher efficiency.

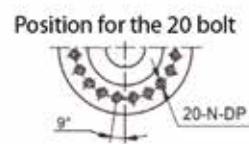

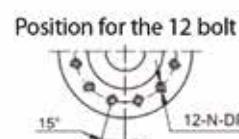

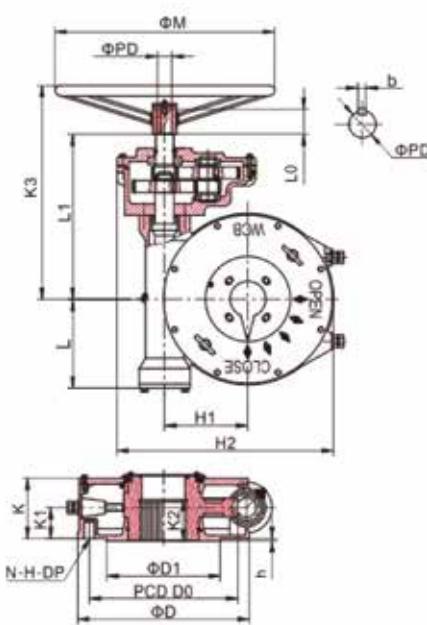

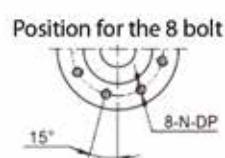

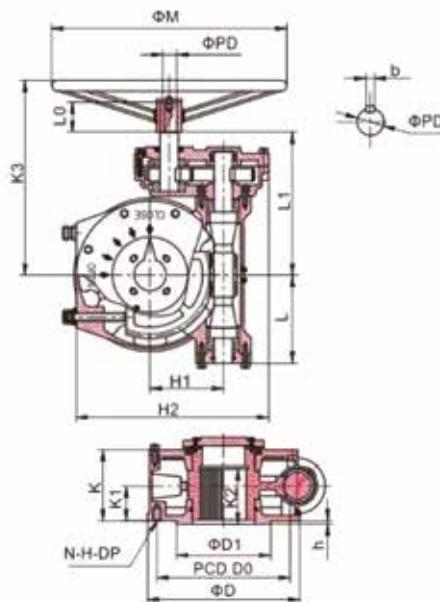

Two connection types for choose: stem and key connection and removable nut type. The mounting flange adapts to ISO 5211.

So the gearboxes installed on the valve are very convenient. General products protection grade is IP65. For special environment can be done IP68 and immersion.

## Option

Available on demand:

- Stainless Steel AISI 316
- Stainless Steel AISI 304
- Carbon Steel.

# MCF-BA Series

This bevel gearbox can be installed directly on the gate valves, butterfly valves, plug valves, globe valves and other valves. By using spiral bevel gears and thrust ball bearing, this series actuator can run smoothly, and has high output torque, low noise and high efficiency. It can avoid from water in and grease out.

Protection grade is IP65. For special environment can be done IP68 and immersion. Handwheel and stem cover can be customized. For different valves and requirement, there are single stage gearboxes with input flange, two stage gearboxes with input flange, two stage manual gearboxes and so on.
